Skills

- Java | Spring Boot | JavaScript | Node | C | MySQL | Redis | Git | AWS(EC2) | GCP | OOP | Microservices | Docker
- Kubernetes | Data Structures and Algorithms | Problem Solving | Backend Development | API Designing

Experience

Software Engineer

17Live Inc.

02/2022 - Current

- Transformed the manual task of peer feedbacks into an automated process, leveraging my coding skills to build a custom Slack app using java, spring boot, sql, redis, gcp etc. This app enabled team members to easily submit peer feedback and helped to increase efficiency and accuracy across the feedback process.
- Built and designed a scalable feedback tracking system: Designed and developed a scalable and intuitive website for team administrators, which provided complete tracking of feedback reports and team growth metrics.
- Released a public Slack app: Developed a public Slack app that was **approved** and listed on the **Slack app directory**

SDE (MG01A)

Paytm

07/2021 - 01/2022

- Designed and created an Incident Management Board: Developed a robust incident management board to track outages that had a significant business impact. This board provided critical information about the duration of the outages and automatically sent emails to relevant business verticals.

SDE - Intern

Paytm

01/2021 - 07/2021

- Designed and created an Incident Management Board: Developed a robust incident management board to track outages that had a significant business impact. This board provided critical information about the duration of the outages and automatically sent emails to relevant business verticals.

Achievements

- Graduated with highest distinction: First Division with Honors
- **4 star rating** at Hackerrank in problem solving (@saty5685)
- Got certification in Problem solving by Hackerrank
- Learning certificate in Spring Boot by Amigoscode

Mentorship

- Demonstrated my leadership and organizational skills by coordinating and mentoring a team of participants in a highly successful coding event on the HackerEarth platform. Leveraged my technical expertise to guide participants through the competition, provide feedback, and ensure smooth event operations.
- As a team leader for a backend development team, helped my team members to grow and develop their skills. Utilized my technical expertise to mentor team members, **resolve technical issues**, **conduct code reviews**, and provide valuable feedback for improvement.
